**For Immediate Release
London, United Kingdom,
December 20, 2012**

Ginbot7 Popular Force (GPF) makes official announcement on its formation and calls on all freedom loving Ethiopians to join the resistance against tyranny.

Ginbot7 Popular Force (GPF) announces its official formation and calls on the oppressed people of Ethiopia to join the resistance and rise up in arms against the Tigray People Liberation Front (TPLF) led dictatorial regime of Ethiopia. GPF has taken this radical step because the alternative will be forfeiting to tyranny all rights and dignity associated with being human and a citizen of Ethiopia.

GPF believes that all civilised options for peaceful political engagement in Ethiopia are firmly shut by the regime in Addis Ababa. The degree of terror that prevails inside the country has made the general public live in absolute fear and insecurity.

Under the prevailing conditions the only way that citizens of Ethiopia can bring about democratic change and make liberty and justice a reality for all is to use all available means, including arms, against the brutal dictatorship in Ethiopia.

GPF is committed to the forcible removal of the dictatorial regime of the TPLF, usher the condition for peaceful and democratic transition, play a part in the creation of a strong and capable national defence, security and police force whose only allegiance is to the constitution of the land, thereby, bringing an end to the existing affiliation of these institutions to the political forces in the country.

Finally, GPF urges the international community to refrain from bankrolling the criminal regime in Ethiopia and demand that donor countries use their financial leverage to exert pressure on the TPLF regime to stop its policy of terror that will seriously destabilize an already fragile situation in the Horn of Africa.
